

Shenzhen LeDe Electronic Co., Ltd

1

The pluggable terminal block, can be configured in many different ways, provides the full advantages of a true Plug and Play solution required by lighting.

Screw type design, no soldering needed, It is ideal for lighting system where the mains sockets is limited and need to connect many different types of the lights together, such as the spotlights or floodlights in the same spot.

The cables can be customized according to the lighting system's requirements.
